PROFESSIONAL SUMMARY

Expert in 3D graphics. Regularly ship with Unity and Unreal; also work with Open3D and Godot — drawn to game engines and to finding universal solutions in media formats. Tech Lead and hands-on artist; from early prototypes to production and release. Bridges art and engineering; clear handoff.

KEY HIGHLIGHTS

- **Engines:** Unity and Unreal in production; Open3D and Godot for exploration and side work. Prefab and asset architecture; import, setup, optimization from the inside.
- **Media formats:** Always hunting the universal bullet — one format or workflow that fits most cases; know where bottlenecks come from and how to fix them.
- **Logic:** Engine constraints and task breakdown; code-level alignment with developers.
- **Leadership:** Mentorship, cross-functional collaboration, Agile/Scrum.
- **Tech depth:** LLM and diffusion architectures; implementation (APIs, automation).

EXPERIENCE

Tech Lead — Cessabit Games LLC, Armenia, 2024–Present

- Modeling, texturing; asset import; scene and prefab setup; Python tools (baking, UV, LOD)

Senior 3D Artist — Fabros Studio, Belarus, 2022–2024

- Full environment art for mobile — blockout to final; technical consultant for junior artists

3D Artist — Spacebit, UK, 2019–2022

- High-poly → retopology → Unity; demo scenes; clients in EU and USA

Freelance 3D Artist — Russia, 2014–2019

- Prototypes and production assets; architecture, product design; hard-surface modeling; 3D for print

SELECTED PROJECTS

- **Cessabit Games**, 2024. Toolchain ownership; engine setup and prefab workflow; scripting (baking, UV, LOD)
- **Fabros Studio**, 2022–2024. Environment art for mobile — blockout to final; mentorship for junior artists
- **Spacebit**, 2019–2022. High-poly to Unity; demo scenes and production assets; clients EU/USA
- **Freelance**, 2014–2019. Prototypes to production; architecture, product design; 3D for print

SKILLS

Leadership: Cross-functional collaboration; mentorship; Agile/Scrum.
Engines: Unity, Unreal, Open3D, Godot. Asset lifecycle from import to runtime; scene and prefab architecture.
3D production: Modeling (polygonal, subdivision, sculpting), texturing, shading — Blender, Maya, ZBrush, Substance Painter, Photoshop.
Formats & toolchain: Universal solutions in media formats; Python, Git; LLM and diffusion for automation. UE5, GIMP.

EDUCATION & AWARDS

Bachelor's in Computer Graphics and Design, Saint Petersburg State University (Applied Mathematics and Control), 2013–2017 · **Specialist in Automation**, Ufa Fuel and Energy College, 2007–2010

Professional development: Advanced Shading UE5 (Udemy 2023) · Hard Surface Blender (Creative Shrimp 2022) · Color Grading (Gleb Alexandrov 2025) · C#, Python, JavaScript (Sololearn 2023)

LANGUAGES

Russian — Native · **English** — B2 (technical documentation and communication)
